

The Voice of the Coast - June 2018

From the Chair

Welcome to the inaugural edition of Voice of the Coast – your quarterly update from Regional Development Australia Central Coast (RDACC).

Here we share what's been happening in the way of economic development, employment, investment and community building across our region.

Tip: What Does it Mean to Eat Ethically?

Local produce doesn't just taste better - it's setting us up for a better future. To help you make ethical food choices, try asking yourself some questions, like: *Where did this food originally come from, and how is its*

packaging affecting our local environment?

Finding the answers isn't easy, but changing where and how you shop is always a good place to start.

If you're a producer, supplier, hospitality or food service business on the Central Coast and want to share how you're contributing to and supporting our local food industry, email us at mail@rdacc.org.au
